🏠 **Lenwood Buddy**
Ideas for the future of the San Jose house

● Brief review

A SHARED HOME FOR IDEAS

What should become of Lenwood?

Lenwood Buddy is the shared repository for ideas about what to do with Lenwood — a place to capture, share, and discuss proposals for the property's future, with room to attach documents and let the thinking evolve over time. Document sharing meets idea capture, focused on one property.

📍 Lenwood Way, San Jose — home to Quentin, Amanda & Sawyer

📋 The brief is ready for your review

It covers the idea, how it works, who it's for, room for growth, what's out of scope for v1, and the open questions. Once reviewed, the next call is whether to go to a PRD.

Idea captured	Brief review	PRD decision	Build

💡 The idea shelf

Every proposal for Lenwood's future lands here — a few sentences or a full plan, with documents attached and discussion kept alongside.

The shelf is empty

No ideas captured yet. The first proposal about Lenwood's future will land here.

🧠 Brain dump

Dump what's on your mind about Lenwood Buddy — raw and unfiltered. Each dump lands in the buddy's repo (docs/ingest.md) as a timestamped entry.

Dump it

❓ Open questions

From the brief — these get answered before (or during) the PRD.

Who gets invited first?

Family and stakeholders in Lenwood's future — Dave curates who gets in.

What documents at launch?

Photos, comps, sketches, links — which types should ideas support on day one?

Accounts or shared space?

Does it need accounts and permissions, or is a shared space enough to start?

Web app or something lighter?

A web app like the other buddies — or a lighter shape for v1?

⚙️ How it works

The shape, as described in the brief.

1 · CAPTURE

Anyone invited can add an idea

A few sentences or a full proposal — low friction by design.

2 · ATTACH

Ideas carry documents

Photos, documents, comps, sketches, links — the evidence lives with the idea.

3 · DISCUSS

Discussion stays on the idea

Reasoning stays with the proposal instead of scattered across texts.

4 · EVOLVE

Everything stays visible

Organized in one place, with room for the thinking to evolve over time.

🌱 Room to grow

Deliberately out of v1 — but the shape has room.

Voting & ranking

Surface the strongest ideas as the collection grows.

Financials

Cost estimates, comps, and tax implications attached to ideas.

Timelines & decisions

Track ideas as they turn into plans, and record the calls made.

Other properties

If the pattern works, the same shape could serve other properties.

Out of scope for v1: this is not a property-management system — maintenance, vendors, and insurance are a different job (that's Property Buddy territory, Lenwood Buddy's parent).
